

What is the Australian Homelessness Vulnerability Triage Tool (AHVTT)?

The AHVTT is a short, voluntary survey that lets us know what housing, supports and referral options are best for you.

With your consent, we will be asking you a few questions about yourself and your journey. We're interested in learning about:

Your identity

Cultural identity, income, how to reach you.

Your housing history

Time in last tenancy, experiences of discrimination by services.

Your social and daily needs

Access to hygiene facilities and services.

Your wellbeing and safety

If you feel safe or experienced violence.

Your health and wellness

Health or mental health conditions, addictions, pregnancy.

At any time you can:

- Choose to skip any question you do not want to answer.
- Change your answers.
- Stop the survey completely.

Your answers will guide us in finding the best housing options and support for you!
